-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. Figures 8 – 11 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claims 7 and 8 are objected to because of the following informalities:
- The claims recite the limitation "the one plate part" in line 2, respectively. There is insufficient antecedent basis for this limitation in the claim.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 – 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Hess (US 1,173,801).

Hess teaches a mounting construction for mounting a tail pipe (Figs.2-4), on an exhaust pipe at a rear-end open portion thereof, having a diameter larger than that of the rear-end open portion, comprising a clamping means (Figs.2-4, Item c), for clamping a periphery of the rear-end open portion of the exhaust pipe (Fig.4, Item B), provided at a front-end open portion of the tail pipe; wherein the clamping means has a pair of plate parts (Fig.3) disposed at right and left positions of the front-end open portion and a connection member (Fig.3, Item 1) for connecting the plate parts to each other by reducing an interval between the opposed plate parts enough to sandwich a periphery of the rear-end open portion between a pair of the plate parts; wherein a concave surface (Figs.3 and 4) whose configuration conforms to that of a periphery of the rear-end open portion which is inserted between the plate parts is formed on each of the plate parts (Fig.4); wherein an axis of the concave surface formed on the plate parts respectively is tilted with respect to an axis of the tail pipe (Figs.2 – 4); and wherein the

connection member has a nut and a bolt screwed into the nut (Figs.3 and 4); and the bolt is inserted into the tail pipe from an open portion formed on a peripheral surface of the tail pipe in penetration therethrough (Figs.1 – 4; Lines 24 – 85).

Conclusion

4. The attached hereto PTO Form 892 lists prior art made of record that the Examiner considered it pertinent to applicant's disclosure.
